**Principal Secretary,
 Hr. & Tech Education,
 Government of Karnataka**

Dear Sir / Madam,

Greetings from ISRO !

As you are aware Indian Space Research Organisation (ISRO, Department of Space launched Chandrayaan3 spacecraft using LVM3 rocket on 14th July, 2023. After successful injection into the precise orbit, Charndrayaan3 orbited around the earth and started its voyage to moon on 01st, August, 2023. It entered into Lunar orbit on 05th August 2023 and the Vikram Lander module has completed two manoeuvres for orbit reduction and is presently in a 24 X 132 km orbit. On August 23rd, 2023, the powered descent will start and landing is expected nominally by 18:03:48 hours.

The soft landing of Chandrayaan-3 is a watershed moment that should inspire the new generation to develop a thirst for knowledge and a love of exploration. It brings the entire nation closer together in a shared sense of pride for India's scientific achievements. It will support the development of an innovative and scientifically curious atmosphere.

For this reason, every school and educational establishment in the country is cordially invited to participate fully in this momentous occasion. Please advise the organisations under your department to extensively promote the Chandrayaan-3 soft landing event among instructors and students and to LIVE broadcast the event on campus.

Solicit your co-operation.

Warm regards,

Yours sincerely,

Sudheer Kumar
